

L'ILAC a le plaisir de vous inviter à sa conférence qui se tiendra **le 28 avril 2022 à 18h15** à Leudelange (bâtiment de Foyer Assurances, 12 rue Léon Laval) sur le thème :

## ESG (Environmental, Social, and Governance) & Insurance

**DENISE DELANEY**

*Head of Responsible Business, Liberty Specialty Markets*

nous fera l'honneur d'être notre orateur

Interest in Environmental, Social and Governance (ESG) themes has grown over decades and exponentially in recent years in financial services and insurance. With roots in the responsible investment movement and drivers like environmental regulation and socioeconomic development, ESG now encompasses a wide range of topics, including climate change. Often seen as a risk, a robust response to these highly interlinked topics can enable ESG to favorably distinguish companies that are approaching the agenda holistically and making positive contributions to society, even in areas with some of the greatest challenge, such as climate change. Taking the lens of Liberty Specialty Markets, a mutual structure, you will understand one insurer's approach to the strategic positioning of ESG and how it is embedded in everyday decision-making, from underwriting to investments to operations.

- ESG & climate change implications for insurers
- ESG regulatory & reporting landscape
- Advancing resilience and inclusive growth – Liberty's ESG strategy
