

L'ILAC a le plaisir de vous inviter à son **Webinar le 20 mai 2021 à 18h15** sur le thème :

«Sustainability: Briefing on latest EIOPA opinion and practical guide for transition risk integration in ORSA and in investment decision making»

Twan Possen - "Triple A - riskfinance"

Responsible for Risk Management Advice and Investment Consultancy

nous fera l'honneur d'être notre orateur pour cet événement.

Sustainability is now a daily recurring item in both the news and our lives. It is also very much on the agenda of the insurance regulators as part of the EU Green deal ambitions, which has resulted - and will likely continue to do so - in a raft of legislation.

Very recently, EIOPA has published a final Opinion on the integration of climate change risk into the ORSA by (Re)insurance undertakings. This Opinion clearly expects from National Competent Authorities to strongly deepen the assessment of climate scenarios by regulated (re)insurance undertakings within the next two years. A new and complex challenge to discover with this webinar.
