

Adviser / Senior Adviser in Actuarial and Insurance Risk Advisory (m/f)

Our Actuarial and Insurance Risk practice helps insurers prepare for the future. We help measure and manage risks, identify efficiency improvements, manage stakeholder relationships as well as analyses and improve performance.

Our services consist of a wide range of services including:

- Capital management and optimization in the new regulatory environment (Solvency II)
- Changes to financial reporting standards (IFRS17)
- Need to embed risk management into business operations
- Quality information for robust and timely reporting purposes
- Dealing with increasing demands from regulators
- Support with acquisitions and divestitures
- Valuation of financial instruments
- Risk calculation and collateral management
- Outsourcing solutions

The role and responsibilities

- A career in KPMG's Risk Advisory group provides you with hands-on opportunities to actively participate to the risk strategies definition while balancing the need to maximize shareholder value.
- We offer an excellent performance related benefits package. We also provide a high standard of professional training to strengthen your technical expertise and ensure your personal development. At KPMG Luxembourg, there are opportunities to further develop your career within our multidisciplinary and international firm. We make your career happen!
- You will be responsible for, or part of larger projects, to help helping our insurance clients in the analysis and implementation of risk management frameworks and models, within a defined risk strategy in line with regulatory requirements.
- You will be part of a team dedicated to maintain and further develop our infrastructure for risk advisory and actuarial services. One major part of your job will consist of supporting the business development in the field of life insurance. As Senior Advisor in the actuarial field, you will become a member of our actuarial group in assuming the responsibilities assigned within the team.

The perfect candidate

- You have gained at least a first experience (1-3 years) in actuarial services.
- Ideally, you have a good knowledge of “life, non-life, property and casualty” insurances and have been involved in several projects such as MCEV and Solvency II calculations and reportings, and IFRS 9 analysis.
- You are proactive and ready to support the growth of our actuarial team.
- Fluency in French and English is essential. Good knowledge of German is definitely an asset.
- You display a positive and enthusiastic attitude and are able to work efficiently and accurately under pressure.
- You have shown continuous good results during your University degree and your personal attitude is striving towards excellent outcomes.
